JULY

IN THIS ISSUE:

- Members share commitment to country
- Annual meeting recap
- Flooding and electrical safety
- Capital credit claims
- Meeting minutes ... and more

PHOTO BY AMBER GERBER

The American flag consists of 13 equal horizontal stripes of red (top and bottom) alternating with white, with a blue rectangle in the canton (referred to specifically as the “union”) bearing 50 small, white, five-pointed stars arranged in nine offset horizontal rows of six stars (top and bottom) alternating with rows of five stars. The 50 stars on the flag represent the 50 states and the 13 stripes represent the 13 colonies that became the first states in the Union.

PHOTO BY CARMEN DEVNEY

Capital member Dan Dacar works part-time at the airport and volunteers for the Veterans Administration, driving veterans to Fargo for hospital appointments. His wife, Bonnie, works for Medcenter One in Bismarck. The couple married one year after Dan’s military service ended. They have five grown children and seven grandchildren, and Dan says he and Bonnie are “very proud of every one of them.”

COMMITMENT TO COUNTRY

The Dacars honor the red, white and blue

by Carmen Devney

After he graduated from Scranton High School in 1967, Dan Dacar wanted to join the military and serve his country. He took a physical and was prepared to pack his bags. But the U.S. Army told him he could not become a soldier because he had a heart murmur and flat feet.

Then the draft was introduced, and Dan was lucky number six in the lottery. Even though he didn’t think the Army would take him, he was asked to take another physical.

“They said, ‘Your feet are just fine and you don’t have a heart murmur. You’re good. Go!’” Dan chuckles as he remembers.

After receiving basic training in Washington State and advanced individual training at Fort Huachuca in southeastern Arizona, Dan was sent to Vietnam on July 4, 1968. He spent the next two years working as an aide to a colonel. Because he volunteered to extend his service with two additional campaigns, Dan was discharged after almost three years and processed out of Fort Carson, Colo.

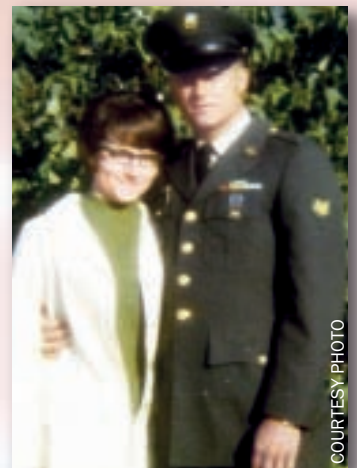

To show the pride he feels in having served his country, and to honor the men and women who have enlisted so that we may continue to enjoy our many freedoms, Dan decorates his lawn with flags three times a year. Just prior to each Memorial

Day, Fourth of July and Veterans Day, he carefully and methodically lines his lawn with colorful and meaningful flags. The ones surrounding a rock pile represent the states where his grown children reside. And the mass of red, white and blue that flicker just below the front porch represent the states in the order in which they were added to the Union, starting with the 13 original colonies.

Dan, a member of Capital Electric Cooperative in north Bismarck, says he could not order the American flags in this particular size with a reduced amount of stars to represent when the states were added — so he made them.

“It was a lot of work,” he shares, “but I figured if I couldn’t make it look presentable, then I wasn’t going to deface it.”

To modify the flags, which he purchased with 50 stars, Dan took fabric paint and covered the stars. Then he bought stars and ironed them on, according to however many a particular flag needed to have to represent when a certain state was added to the Union.

One of Dan and Bonnie's grandsons, Mason Gerber, holds grandma's hand as he admires grandpa's handiwork. Mason is the son of Amber and Brad Gerber.

COURTESY PHOTO

Dan served in the U.S. Army from 1968 to 1971. His most memorable experience during that time was being awarded Soldier of the Month out of the 30,000 to 40,000 men in his unit. The honor was bestowed along with a custom-made silk suit. When asked if the suit still fits, Dan laughs and shakes his head, but shares that he keeps and treasures the suit anyway.

Dan and his wife, Bonnie, moved into the Capital Electric service area five years ago, and Dan has decorated the lawn for the past three years.

One of his neighbors, April Meckle, reveals Dan's secret to making the flags look so uniform.

PHOTO BY APRIL MECKLE

Madalyn Meckle might be too young to understand Dan's commitment to country, but she sure likes her neighbor's colorful flags. Madalyn is the daughter of Bob and April Meckle and granddaughter of Jim and Dorothy Meckle, who are all members of Capital Electric. She is also the granddaughter of Tom and Lena Volochenko and the great-granddaughter of Walter and Lorraine Volochenko and Irene Sauter.

"He made a tool so that each flag is exactly the same distance apart," she says. "He definitely takes pride in his flags."

Even though it takes a considerable amount of time to hand-plant more than 200 flags, Dan says the "work" is enjoyable, and that he plans to continue the tradition as long as he can. It is one of the many ways in which he shows his patriotism and commitment to country.

"I am proud to have served," he concludes.

Capital Electric thanks Dan and Bonnie for sharing their story, and thanks all the service men and women who fought and continue to fight so that we may be free.

Bismarck Mayor John Warford addressed the membership with flood facts and figures, and gave encouragement to those who were weary from sandbagging and evacuating.

vided a welcome distraction for some of the 834 attendees who enjoyed a hearty meal.

The focus of this year's meeting was flooding and safety. Bismarck Mayor John Warford addressed the membership with facts and figures, and gave encouragement for those in the heart of the situation. Lt. Gov. Drew Wrigley touted the cooperative's last 65 years of service to the membership, and Lars Nygren, general manager of Capital, provided detailed information on flood preparation and recovery as it relates to electric service.

"We are working hard to keep the power on in all areas. We realize you need power to run pumps for surface or ground water," assured Nygren. "Keeping everyone safe is the top priority when the water rises and inundates a home."

Business meeting

In addition to information on the flood, Nygren and Board Chairman Dwight Wrangham updated the membership on a variety of operation issues.

1) Capital Electric's membership has expanded by approximately 5,000 members in the last 10 years. More than 500 of those members were added in 2010.

2) The Western Area Power Administration (Western) continued to raise its rates due to drought effects in 2010. The co-op is looking for more stability in Western's rates now that the water levels have stabilized in the reservoirs.

3) Basin Electric Power Cooperative continues to develop alternate power sources in the form of wind energy and gas turbine generation. The generation and transmission co-op is also adding a 385-megawatt baseload generating station in Gillette, Wyo., estimated to cost \$1.3 billion. Basin is in the power-supply building mode due to the growth of its members.

Capital Electric annual meeting recap

"We are working hard to keep the power on in all areas. We realize you need power to run pumps for surface or ground water. Keeping everyone safe is the top priority when the water rises and inundates a home."
—Lars Nygren, Capital Electric Cooperative general manager

by Wes Engbrecht

Even though it was a busy and uncertain time for many people who were sandbagging or planning to evacuate, hundreds of Capital Electric members took a break from their flood preparations to attend the cooperative's 65th annual meeting. Held June 1 at the Ramkota Hotel in Bismarck, the meeting provided

4) Capital is looking to add a prepay system for electric service that would be advantageous for some to better manage their accounts.

Board election

During the business meeting, three members were elected to serve three-year terms on the board of directors. Incumbents Rodney Eckroth in District 1 and Kyle Hilken and Rex Hollenbeck in District 2 were re-elected to serve additional terms. Capital thanks the Nominating Committee for putting forth the following names as board candidates: District 1: Rodney Eckroth; District 2: Kyle Hilken, Rex Hollenbeck, LeAna Hug, Bill Patrie and Leo Voigt. The co-op also thanks all the candidates for offering to serve their electric cooperative.

Capital kids

The member-owners of Capital Electric are making the annual meeting a family affair. From dancing to the upbeat tunes played by Joe Friday's Dixieland Jazz Band to eating cheesecake and watching a movie, Capital kids can always find something fun to do at the annual meeting. Members, thank you for bringing your children and showing them the importance of active participation in their family's electric co-op. They are our future members and decision-makers!

All three incumbents were re-elected to serve three-year terms on the Capital board of directors including (l-r) Rex Hollenbeck and Kyle Hilken from District 2, and Rodney Eckroth from District 1.

Bentley Solem helps her mom register members. She is the daughter of Dana and Dayne Solem, who are Capital members from Bismarck. Dana also works for Capital as a cashier/receptionist.

Rylan Gierke and his sister Paiton finish their meatballs and mashed potatoes, and eagerly await a bite of cheesecake. They are the granddaughters of Capital members Durwood and Sandy Geier of Bismarck.

This year, Capital's board of directors approved the capital credit retirement of all unretired capital credits from 1995 plus estate retirements totaling more than \$1,250,000. While twins Kennedy (left) and McKenna Kensmoe are too young to pick up a check, some day they might be co-op members who appreciate this principle of economic participation. The girls are the daughters of Kent and Jo Lynn Kensmoe, and the great-granddaughters of longtime Capital member Mary Helm. Kent is also the information technology specialist at Capital.

Madelynne (left), Annabelle and Alexander Fuchs patiently wait in the courtyard for the meal to end and the kids' movie to start. They are the children of Capital members Suzzanne and Eric Fuches of Bismarck.

Russell Birdbear watches the movie "Beverly Hills Chihuahua 2" with his daddy. Russell is the son of Capital members Caleb and Laticia Birdbear from Bismarck.

Seth Lothspeich, journeyman lineman for Capital, has some oversized fun with Parker Engbrecht. Parker is the son of Capital members Wes and Danay Engbrecht of Bismarck. Wes is also the communications and public relations director for Capital.

The annual meeting is a family affair for Capital members Chris and Tiffany Baumgartner and their children Benedict, Lucia and Jude (the baby). They are also joined by Tiffany's father, Ken Kreitinger, who is also a Capital member from Bismarck.

CAPITAL CREDIT CLAIMS

Notice of redemption by Capital Electric Cooperative, Inc.

Listed below are the names of former Capital Electric Cooperative, Inc. members who had capital credit checks mailed to them in June of the year 2005. These checks have been returned to Capital Electric Cooperative by the postal service because they could not locate the members at the address on file. A further search by Capital Electric personnel has not turned up their whereabouts.

If you received electrical service from Capital Electric Cooperative, Inc. any time during the year 1989 and your name is on this list, please contact our office. If you know of the whereabouts of members on this list who received electrical service

from Capital Electric Cooperative, Inc. any time during the year 1989, please have them contact our office at (701) 223-1513.

Please keep in mind that not all of the capital credit amounts are large. However, we desire to get the money due to those who earned it, and clear up our records.

We will redeem capital credits for those members on the following list who notify us prior to Dec. 1, 2011. Notice is hereby given that any of the aforementioned unclaimed capital credits outstanding after Dec. 1, 2011 will be forfeited pursuant to Section 10-15-34.1 and 10-15-23 of the North Dakota Century Code.

Losing electric service may mean losing their homes to the rising river for many members across the Capital Electric service area. Capital members Stacy Tschider and Mike Odegaard (pictured) are two of the countless homeowners who have worked hard to sandbag and protect their property using sump pumps to keep water from filling their homes' lower levels. They can still use ATVs to traverse submerged roads to check pumps and water levels around the entire area.

They have planned for the worst but are still hoping for the best.

"We're doing our best to keep the water out and we're going to be in it for the long haul," says Tschider. "We think our dikes will hold up and as long as we can pump water, we will keep things dry."

Planning for the worst, hoping for the best

Story and photo by Wes Engbrecht

At Capital Electric's annual meeting, the main message was flooding and electrical safety. The co-op has nearly 1,000 accounts which lie outside of the protective county and city levees. Lars Nygren, general manager of Capital Electric, advised consumers who live in the flood-affected areas that the cooperative recognizes members will need power to run pumps for surface or ground water. However, the co-op has and will have many more flooded facilities such as transformers, vacuum fault interrupters and miles of underground conductor.

"We know the transformers can continue to work under water. We also know these same transformers can fail and there is no way to restore service. If a storm or equipment failure knocks out power where our equipment is flooded, we may be unable to restore service until the flood waters have receded. Therefore, it is prudent for individual members to have a standby generator that they can turn to in order to run pumps or whatever else they need," stated Nygren.

"We are also aware that access to your home may become impossible and you may not be able to start a standby power source. We know you need power, and we desire to keep it on, but understand with the flood, we may be in a situation where we cannot restore the power you need."

Capital Electric commends the spirit of the homeowners and volunteers who continue to face this disaster. We are committed to keeping the power on as long as possible, unless we are asked to discontinue service by city officials. For more information on flood preparedness, standby generators and evacuation instructions, please visit our Web site at www.capitalelec.com or call us at (701) 223-1513 and we'll do our best to answer them.

Avoid electrical hazards around water

- Do NOT go into the basement if your basement is flooded. Call Capital Electric at (701) 223-1513 and we will disconnect the electrical service.
- Keep outlets covered and dry.
- Keep cords and plugs away from water. Never handle electrical items, plugs or outlets when wet. If an electrical product falls into water, do not try to retrieve it by reaching into the water. Make sure you are dry and not in contact with water or metal surfaces, and unplug it immediately or shut off the circuit powering the item.
- Protect your outlets near water with a ground fault circuit interrupter (GFCI). By detecting ground faults—an unintentional electric path between a source of current and a grounded surface; essentially, current leaking to the ground—a GFCI protects you from severe or fatal electric shocks. It can also prevent some electrical fires.

IMPORTANT NOTE: When a person gets immersed in an isolated body of water, the water could become electrified without involving a ground fault as the electric current passes through water (and perhaps a person) from one electrical pole to the opposite pole. In this case, the GFCI may not provide shock or electrocution protection.

CAPITAL ELECTRIC COOPERATIVE *board minutes report*

May 20

The regular meeting of the board of directors of Capital Electric Cooperative, Inc., was held May 20 at co-op headquarters in Bismarck.

Financial review (April 2011): Prior to the board meeting, Directors Haugen-Hoffart and Eckroth reviewed the April 2011 check register and expenditures. Eckroth reported all checks were in order. It was moved, seconded and carried to approve April expenditures in the amount of \$1,988,702.81.

Business department report: The manager reviewed the April financial and statistical report with the board. Total kilowatt-hour (KWH) sales reported for April 2011 were above budget by 14 percent. The actual monthly electric revenue is 15 percent over budget. The year-to-date actual KWH sales were over budget by 9 percent.

The margin for April is \$206,521 versus the budgeted margin of \$97,751, an overage of \$108,770. The year-to-date margin is \$708,706, above the budgeted margin by \$129,040, or 22 percent.

Capital began billing 32 new services in April, bringing active services to 15,734 versus 15,289 at this time last year, or a net increase of 445 accounts over the last 12 months.

Staff is looking into costs and processes for prepaid metering. No decision or recommendation has been reached.

We continue to look into High Deductible Health Plans (HDHP) and Health Savings Accounts (HSA). Another employee meeting will be the next step.

We are starting to prepare for our National Information Solutions Cooperative (NISC) 2.0 accounting and business software upgrade. This upgrade affects all accounting and work order modules.

All of the information requested by Power Systems Engineering has been delivered for updating the Cost of Service study. We are looking for some results in the next couple of weeks.

Preparation continues for the annual meeting.

Rural Utilities Service (RUS) requires that we certify that we implement and maintain a written standard policy for the interconnection of distributed resources. It is expected that this policy will be certified to RUS by July 1. Action will be deferred to next month, following attorney review.

Federal Emergency Management Agency (FEMA) storm reimbursement: FEMA wrote a check for the entire invoice amount of the Cass County Electric bill even though we already received two-thirds of the amount. After we notified FEMA that we only should get the portion not already paid, they told us to cash the check anyway and they would issue a negative funding, and we could then cut a check back to FEMA for the difference.

The manager reviewed the comparison of actual-to-budgeted expenses for the month of April and for the year-to-date through the month of April 2011. Ac-

counts receivable balances as of May 19 were reviewed.

Capital credits: Following review and recommendation of the financial condition of the cooperative and recommendation by management, it was moved, seconded and carried to authorize payment of capital credits to the following deceased members' estates:

Glen Aichele	\$3,271.72
Don Flemmer	2,766.73
Dorothy Howe	370.93
Bertha Baumiller	406.63
Leslie Blake	11.46
Bertha Baumiller	406.76
TOTAL	\$7,234.23

Engineering and operations report: The manager reviewed the written report from the engineering and operations department. Ten work orders were completed this month, adding five new consumers to the system.

Rick Geiser, lineman, started working for Capital on May 2. Terry Mertz retired May 2, and Mike Berg has officially taken over the staking engineer position.

The East Century Avenue and Centennial Road project has started. JB Construction, Fisher Contractors, and our crews have been busy trenching in new underground line, building temporary overhead distribution line, and rerouting our transmission line.

DLT Contractors has been busy installing underground tie lines in some of our subdivisions. Bullinger Tree Service has started on trimming trees in our service area; we try to trim half of our service area each year.

The attorney will review revised rate schedule "PG" prior to the June board meeting. No action was taken on the revised rate.

Member services department: The manager reviewed the written report from the member services department.

We coordinated with Geosystems (Econar), Roughrider Electric Cooperative and Verendrye Electric Cooperative to conduct geothermal training in Dickinson and Minot. The intent of the training was to expand Econar's brand into the western part of the state. The training sessions resulted in approximately 40 contractors and cooperative employees in attendance.

The North Dakota Utility Rebate Program continues to be a very successful program. So far, Capital Electric has processed more than \$260,000 in stimulus rebate dollars to our members.

Easements: The board reviewed the proposed land exchange, water main easements and right-of-way easements with the city of Bismarck. It was the consensus of the board to move forward with these discussions and to include additional easement concerns the cooperative has with the city to resolve all outstanding easements and right-of-way issues together.

Communications and public relations department: The manager reviewed the written report from the communications

and public relations department.

Safety report: There were no lost-time accidents this month.

On April 26, Capital helped sponsor a "Call Before You Dig" banquet.

Paul Davis, safety instructor from the North Dakota Association of Rural Electric Cooperatives (NDAREC), was at our shop conducting a safety meeting on mayday procedures and pole-top rescue.

Central Power Electric Cooperative and Basin Electric Power Cooperative reports: Director Mund reported on Central Power and Basin matters. Basin wind farms collectively ran at 43 percent for the month, even though the Western Area Power Administration (Western) requested certain farms to shut down due to increased Western generation.

The Corps of Engineers is predicting runoff at 178 percent of normal.

2010 auditor's report: Eide Bailly issued a "clean" unqualified opinion. They also performed a "single" audit of the FEMA funds the cooperative received, which was also a "clean" unqualified opinion. It was moved, seconded, and carried to approve the 2010 audit report.

The auditors also reviewed Operation Round Up and found it in good order.

NDAREC report: An NDAREC meeting was not held this month.

National Rural Electric Cooperative Association (NRECA) legislative rally: Nygren and Mund attended the NRECA legislative rally in Washington, D.C. Both felt positive contacts were made; however, they expressed difficulties when staff is not interested in your concerns.

RESCO report: Wrangham was selected as delegate and Liuska was selected as alternate to the special meeting on June 13.

Adjournment: There being no further business to come before the meeting, without objection, the meeting was adjourned.
